

EMBEDDED ANALYTICS

With Tableau

DataSpark

Thinking about supercharging your client experience?

WHAT IS IT?

Consider Embedded Analytics

Embedded lets you integrate your data analytics directly into your applications and label it as your own. While it is simple to implement, it comes complete with all the powerful features of Tableau we know and love. Customers and partners can interact with customisable self service dashboards with the level of access you choose. Take it with you and get immediate results when you need it so you can spend more time doing what you do best!

Need further assistance? Speak to one of our account managers about our Virtual Data Team. Whether you want help supercharging your systems with custom reports and integration into other systems or bringing all of your business data and social data into one manageable view. Whether you want to find clarity in your staff performance, through quick and easy reporting methods. Or perhaps that you're strapped for time and would like someone to do your integration for you. Whether the job is big or small, your Data Team is here to help you see and understand your data. Virtual Data Team allows our clients to have all of the data capabilities sitting as an extension of their own team. Better yet - because we work with an array of different businesses, we can always provide a broad perspective to each of our clients to expand their knowledge and improve capabilities
